

# KSIMC of Birmingham

## CENSUS REPORT

### 2011/2012

# Background

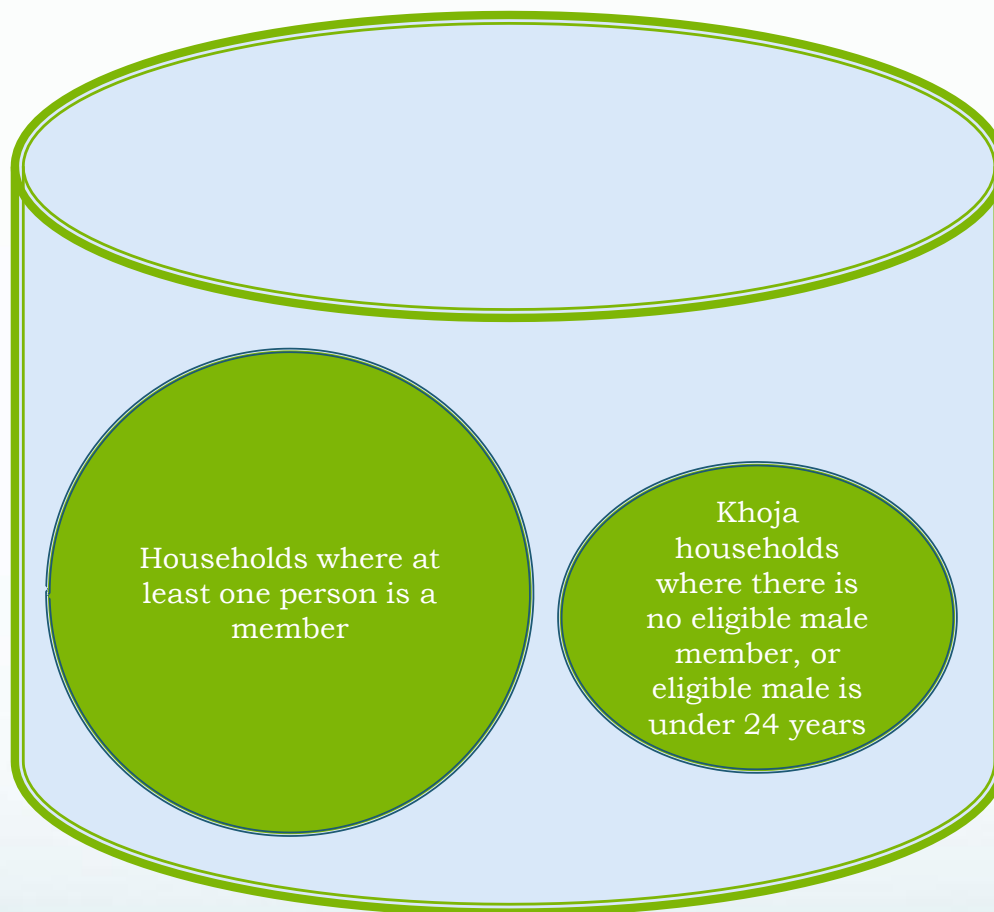

- Census conducted between 06 November 2011 and 30 April 2012.
- Data collected online at [census.ksmnet.org](http://census.ksmnet.org)

- Workstations were in place during programmes to help people complete the census, particularly those who did not have access to the internet.
- Of the 494 registered members, 429 completed – **87% response rate.**
- Data was cleansed and verified where necessary.
- No data has been personally attributed to anyone. All analysis has been undertaken by demographic groupings.
- A comparison is undertaken with figures from the 2011 national census. At the time this report was produced only high-level figures were available from the 2011 census. We would therefore recommend that further comparisons are undertaken once the full report is published.

# Criteria for population analysis

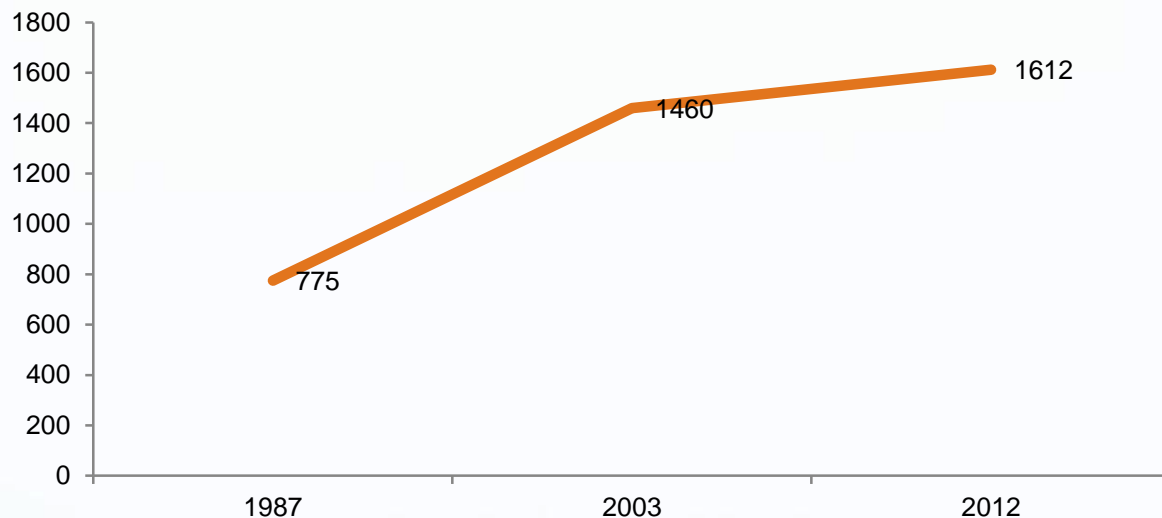

# Population

- Average persons per household is **3.63**  
Total population from census data (1,376) / Number of households from census data (379)
- Population from members is approximately **1,536**  
Number of households with at least one member (as per membership list) is 388. Number of households where there is no eligible male member, or if there is, the eligible male is under 24 years is 35 (as per census data)  $(388+35) * 3.63 = 1,536$
- Total population is approximately **1,612**  
Based on 5% of khoja population who live in households where there is no member. This estimation is derived from the census data, where 3.7% of khoja population are non-members.
- Population from 35 non-khoja members is **138** (8.6% of the total population)
- Average persons per household in England and Wales – **2.4**  
Population for England and Wales – **56,076,000**  
Number of households in England and Wales – **23.4 million**
- Population for West Midlands – **5,602,000**

# Population growth since 1987

The last census was conducted in 2003, and previous to that in 1987

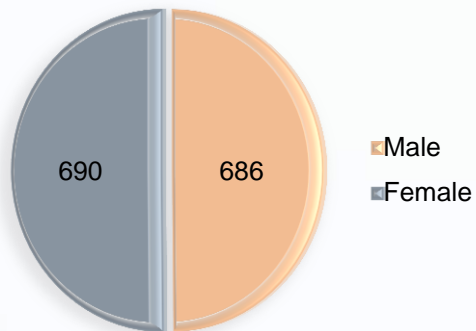

Based on the above figures, the population has increased by approximately 10% in the last 9 years. The criteria used in the 2003 census however included all those *who regularly attended the mosque*, regardless of whether they were khojas or members.

If the criteria used in 2003 would have been the same as the one used in this census, the population in 2003 would have been lower than 1,460 – therefore a higher increase than just 10% over 9 years. You will also note from page 8 that there has been a significant increase in population over the last decade.

The building committee is undertaking a count of people who attend the centre when various programmes are held.

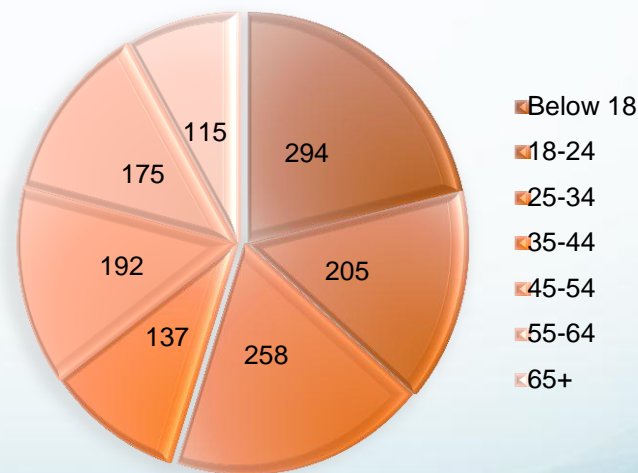

# Household numbers by gender and age

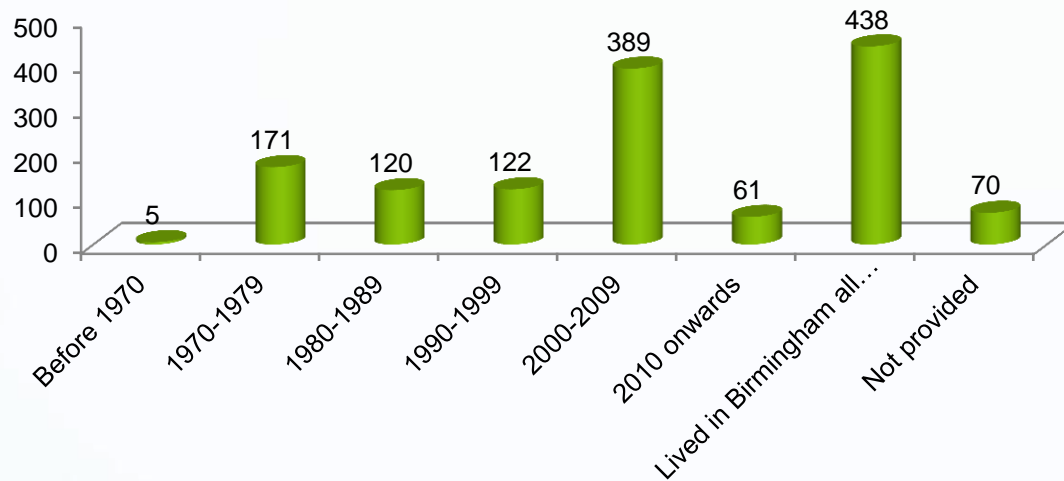

Age Group	Male	Female	Grand Total
Below 18	21.72%	21.01%	21.37%
18-24	16.03%	13.77%	14.90%
25-34	19.97%	17.54%	18.75%
35-44	8.89%	11.01%	9.96%
45-54	11.81%	16.09%	13.95%
55-64	14.43%	11.01%	12.72%
65+	7.14%	9.57%	8.36%
Grand Total	100.00%	100.00%	100.00%

- Average age is 35
- Median age is 31, national figure is 39
- 55% are below 34
- Average number of children per household where there is a child is 1.7
- Number of people aged 65 or above is 115 (8.4%)
- Male to female split is nearly equal

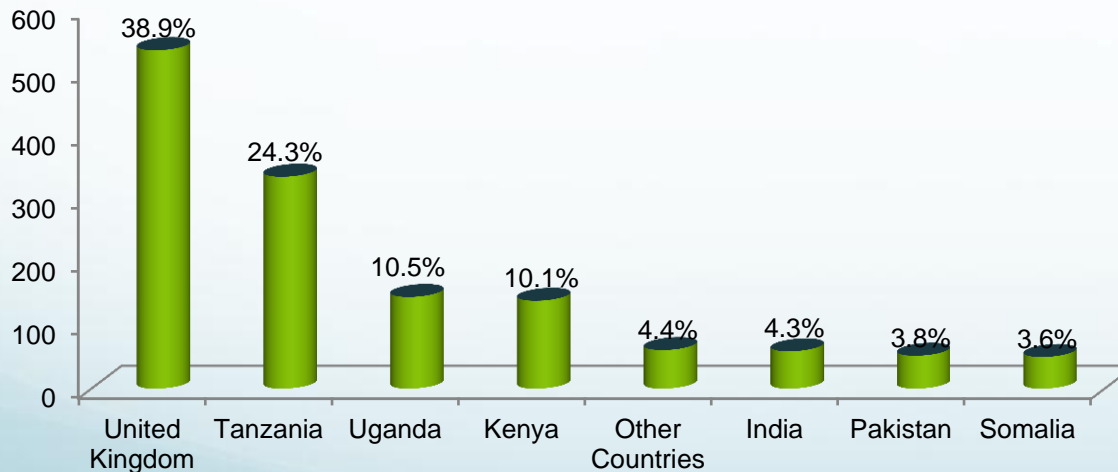

# Migration into Birmingham/birth country

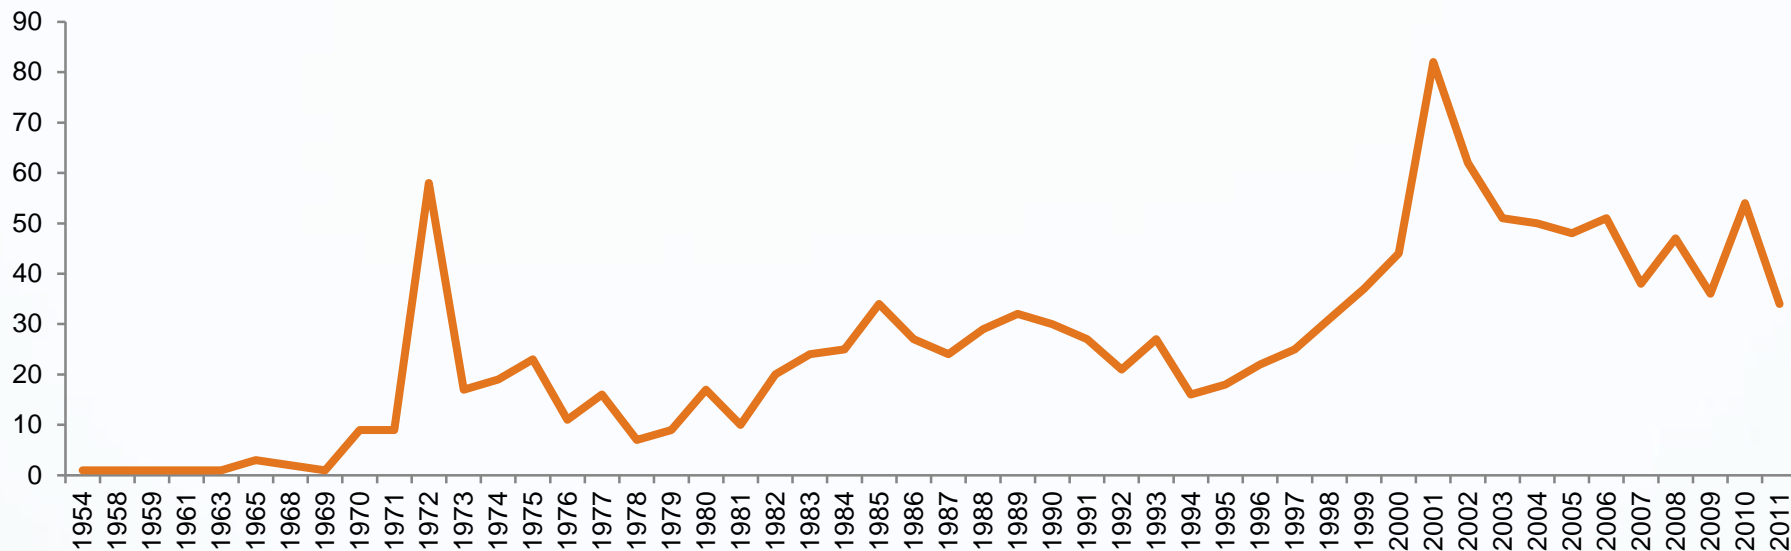

- 32% have lived in Birmingham all their life
- 33% migrated after 2000
- 24% are born in Tanzania

# Year of arrival into Birmingham (birth/migration)

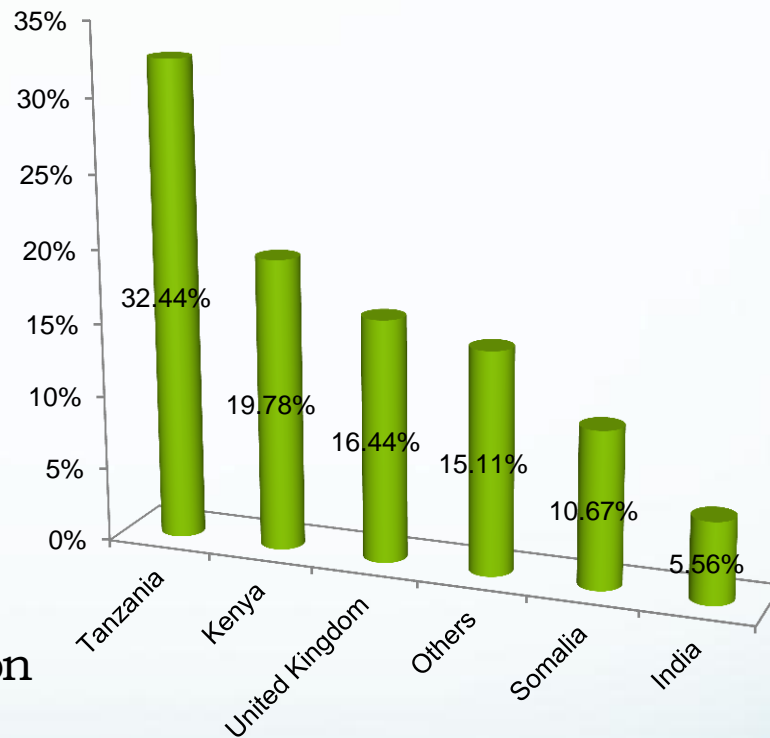

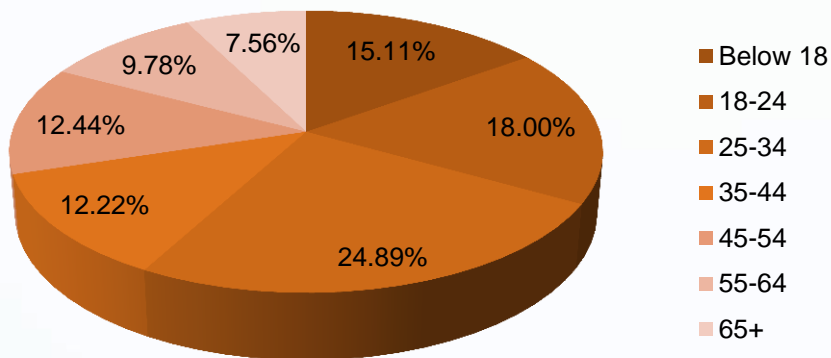

- Top 3 years are 2001 (82), 2002 (62), 1972 (58)
- Of these 88%, 79%, 97% respectively were migrations
- 84% of the people who migrated in 1972 are born in Uganda and 40% of the people who migrated in 2001 are born in Somalia

# Migration into Birmingham – 2000 onwards

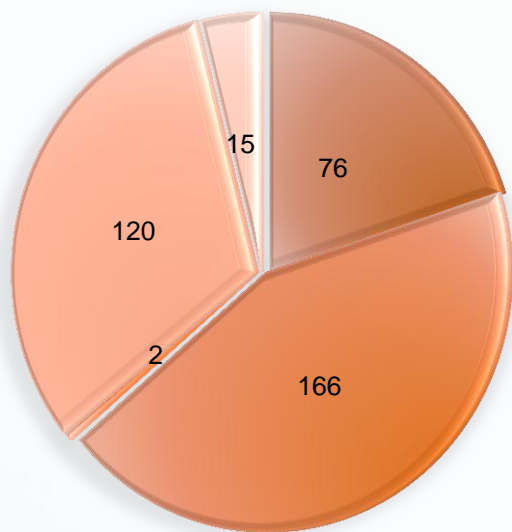

Country of birth of migrants 2000 onwards

- 58% of migrants are below 34 years
- 14.2% are currently in full-time education at a University/College
- 43% are currently in employment or self-employed

# Household status

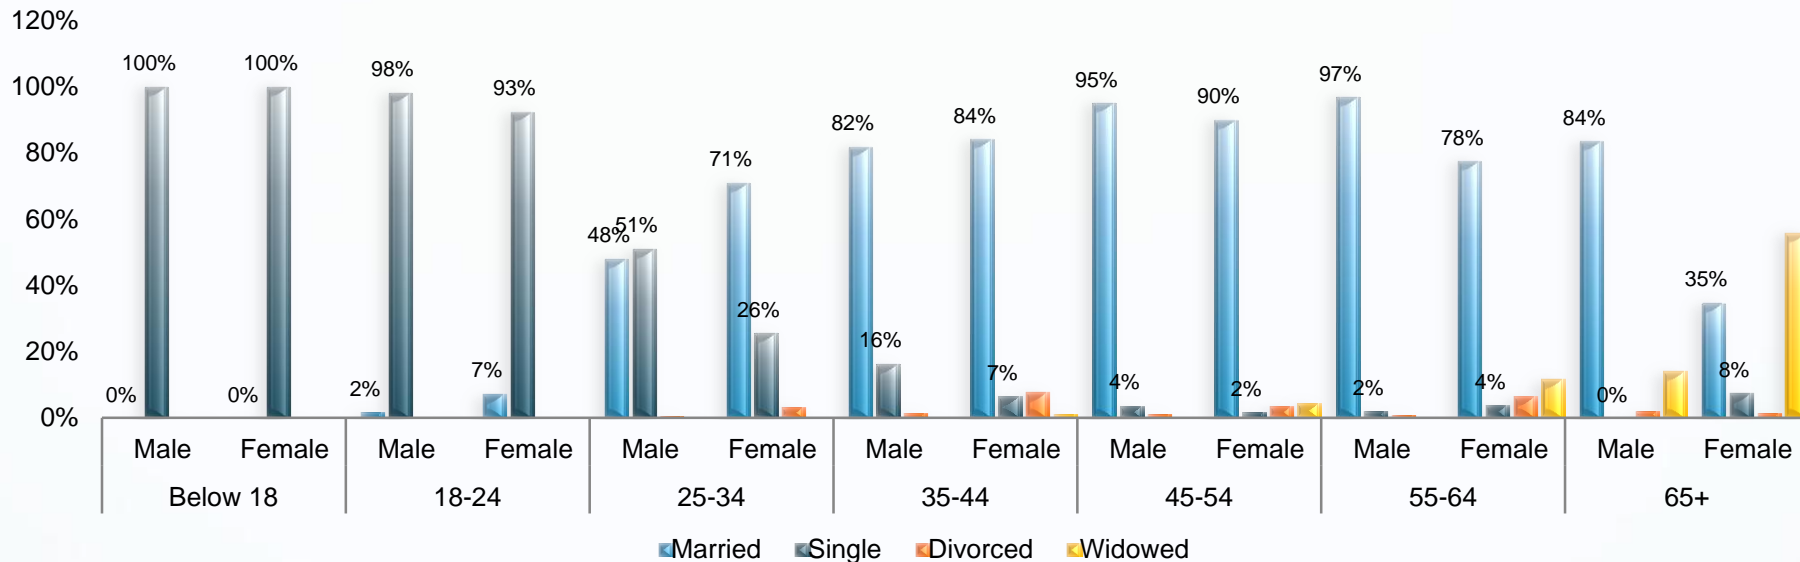

- Owns outright
- Owns with a mortgage or loan
- Part owns and part rents (shared ownership)
- Rents (with or without housing benefit)
- Lives rent free

Household Status	Number	%
Owns outright	76	20.05%
Owns with a mortgage or loan	166	43.80%
Part owns and part rents (shared ownership)	2	0.53%
Rents (with or without housing benefit)	120	31.66%
Lives rent free	15	3.96%
Grand Total	379	100.00%

64.4% of households own the properties they live in (67% in 2003)

# Marital status

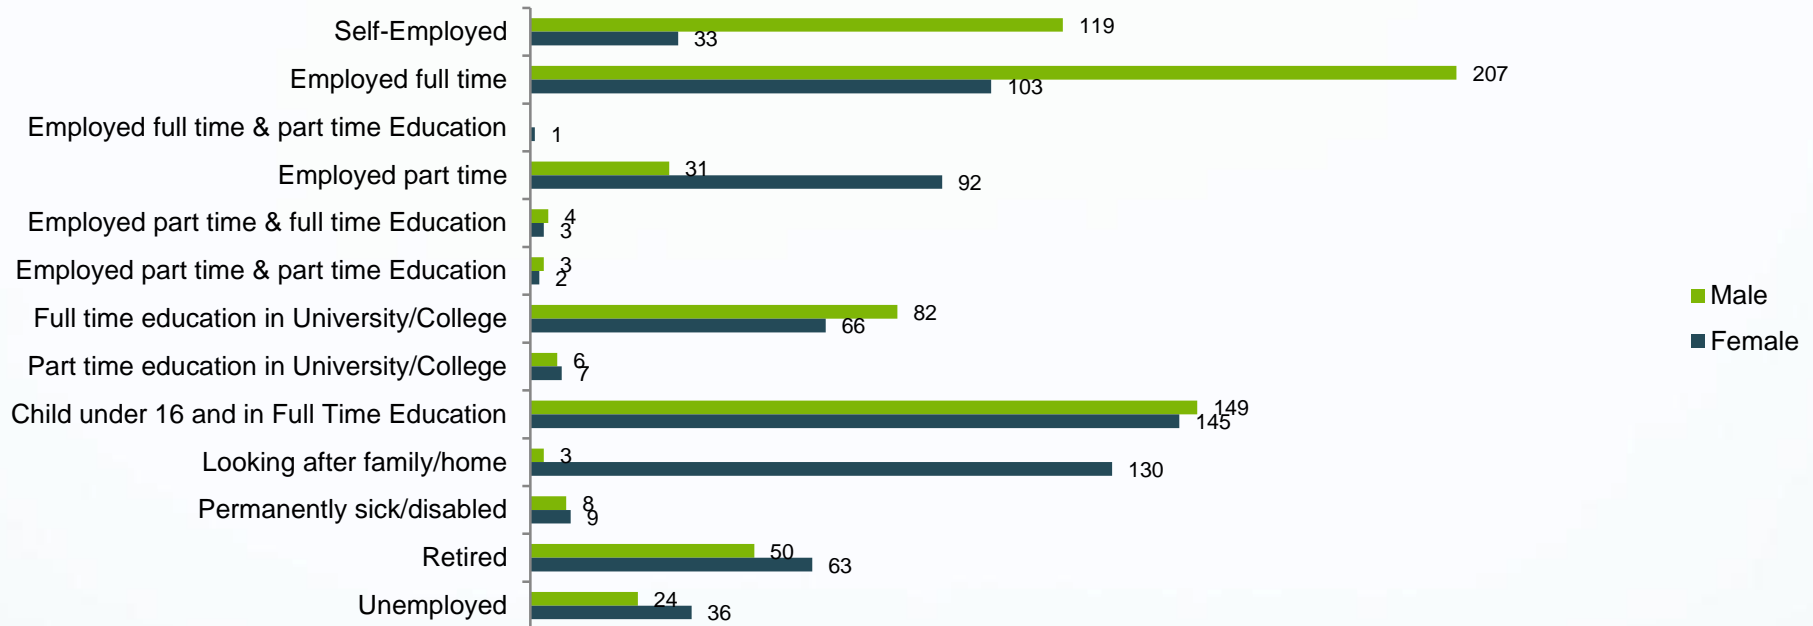

## Not married:

- 52% male and 29% female between 25-34
- 18% male and 16% female between 35-44

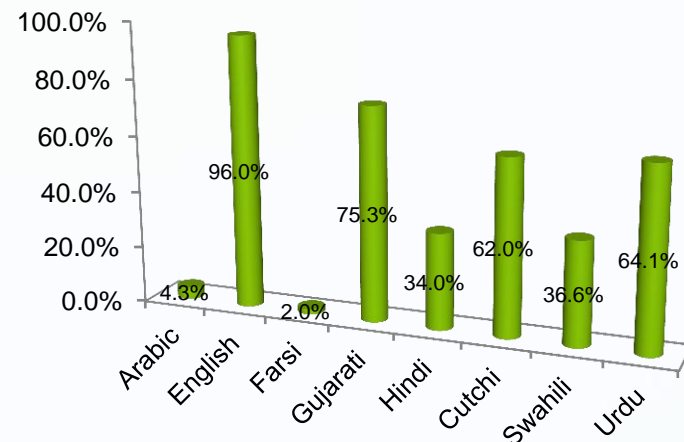

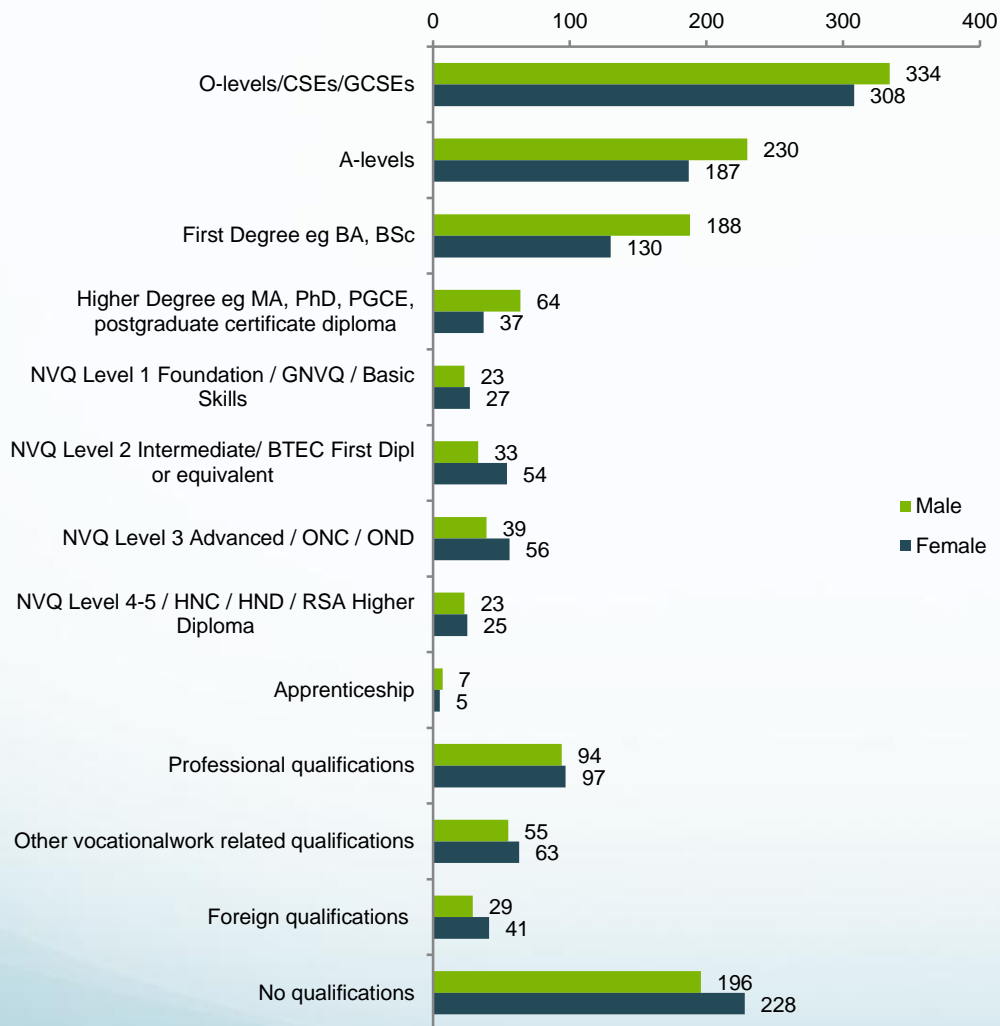

# Employment status

- 43.5% are employed / self – employed
- 12.7% are in full-time or part-time education (34% if we include children under 16 and in education)
- 54% of female between 25-64 are employed / self-employed
- 55 (14.6%) of male between 25-64 are not in employment. Of these 34 (62%) are aged between 25-54
- Of those in work, 6.2% are Pharmacists , 4.7% Teachers, 3.3% Medical Doctors, 3.2% Optometrists, 2.7% Accountants

# Qualifications / languages

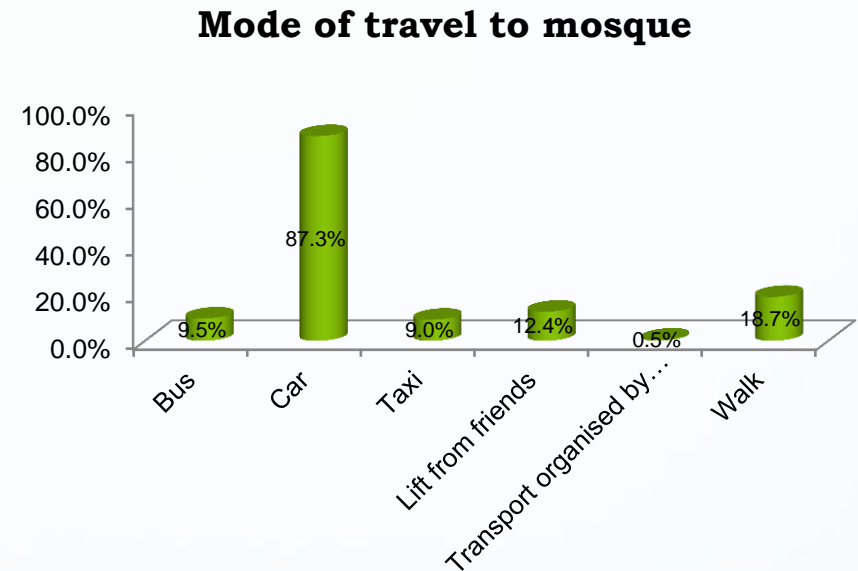

- 25% are educated to degree level
- 13.9% have a professional qualification
- 30.8% have no qualifications

# Number of cars/mode of travel to mosque

Number of cars in household	Number	%
0	53	13.98%
1	125	32.98%
2	141	37.20%
3	40	10.55%
4	17	4.49%
5	3	0.79%
Grand Total	379	100.00%

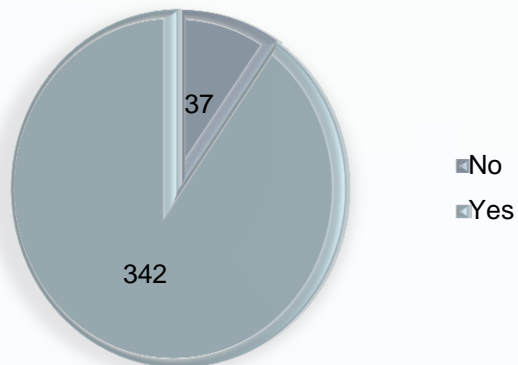

- 86% of households have at least one car (81.5% in 2003)
- Average number of cars per household is 1.6
- 87.3% use a car as their primary mode of transport to travel to mosque

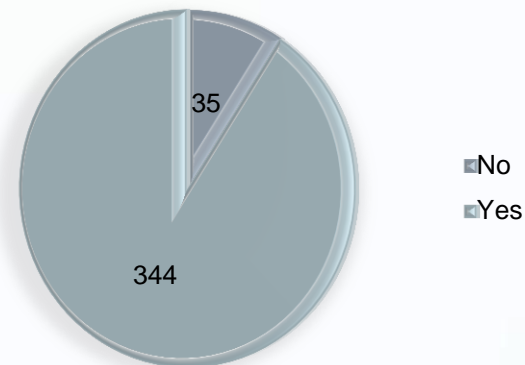

# Household access to computer and internet

**Access to Computer**

**Access to Internet**

90% of households have access to computer / internet

# Summary

**43%** migrated or born in Birmingham after 2000

**32%** have lived in Birmingham all their life

**87%** use a car as their primary mode of transport to travel to mosque

**25%** are educated to degree level

**30%** have no qualifications

**6%** of the working population are Pharmacists

**96%** can speak /understand English

**55%** are below 34 years

**24%** are born in Tanzania

**10.5%** are born in Uganda

**10%** are born in Kenya

# Thank You!!

*The Census Team wishes to thank all members who completed the Census and all those who supported in the data collection/analysis process*
